Color LCD Panels

Display PC graphics
and video in true
color.

Perfect for overhead-projector presentations, the 16.7 M True Color LCD Panel takes only few minutes to set up.

Key Features

- ▶ Three models to choose from—16.7 M, 262K, or 32K.
- ▶ 16.7 M and 262K Panels include active-matrix thin-film transistor (TFT) LCD.
- ▶ 16.7 M Panel features S-Video and composite inputs.
- ▶ Remote-control support.
- ▶ On-screen menus for easy set-up.
- ▶ Weighs just five pounds (2.3 kg).

Overview

16.7 M True Color LCD Panel

The 16.7 M True Color LCD Panel adds life to your presentations. It lets you project spreadsheets, charts, and graphs, as well as video images, such as VCR, laser disc, and live video camera, onto a display—in true color. What you see on the monitor is exactly what you show to your group.

The Panel projects up to 16.7 million true colors and features an active-matrix thin-film transistor LCD for image accuracy.

Best of all, you can run your presentation with a remote control (included with each panel). Set tint and contrast, fine tune, center an image, intensify a picture, freeze an image, select Mouse 1 or Mouse 2, video or PC graphics, even graphics or text. You can also save color

settings for your next presentation.

On-screen menus help you install the 16.7 M right from the front panel. The Panel automatically adjusts to the maximum number of colors for your software, too. And it works with all VGA and Mac® II computers. It also includes S-Video and composite inputs for connecting equipment.

Take the Panel with you anywhere. Weighing just five pounds (2.3 kg), it's the perfect traveling companion.

262K and 32K Color Panels

The 262K Panel projects up to 262,144 colors and, like the 16.7 M Panel, includes an

active-matrix thin-film transistor LCD for image accuracy.

You can also select image centering, contrast, color selection, tint, and more from a remote control unit or from the front panel. The 262K Panel teams well with your VGA PC, Mac II, Mac LC, or PowerBook™.

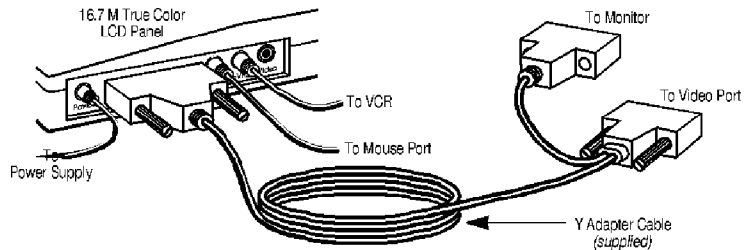

For the budget-minded who still want impressive presentations, choose the 32K Color LCD Panel. It projects up to 32,000 colors, and includes the same remote-control features as the 262K Panel. Use the 32K with your VGA, EGA, or CGA computer.

Typical Applications

Use the 16.7 M True Color Panel and your Mac II computer for an arresting multimedia show that includes live video-camera images.

Doc# 12197

To get your 16.7 M Panel up and running, just plug in the cables. There's no software setup.

Technically Speaking

- ◆ Colors are reproduced as closely as possible to colors of the CRT monitor. For the 32K Panel, you can select settings for 8, 27, 64, or 32,000 colors. For the 262K Panel, the setting choices include 8, 64, 2,197, 32,786, and 262,144. For the 16.7 M Panel, the choices are 512, 262,000, and 16.7 million.
- ◆ A triple-fan cooling system keeps your Panel running smoothly throughout your presentation—even if the session runs all day.
- ◆ For added convenience, we offer you a Remote Control Mouse and Laser Pointer. The Mouse gives you greater control during your presentation, letting you walk around the room, up to the screen, even into the audience. The Laser Pointer projects a bright red laser beam that appears as a red dot on any surface, including walls, overhead projection screens, video-display monitors, and more. And you can stand and project up to 450 feet (137.2 m) away from the surface.

The Complete Package

What you get when you order Color LCD Panels.

- 16.7 M True Color LCD Panel Includes:**
- ◆ LCD projection panel
 - ◆ VGA Y-adapter
 - ◆ Mac® II adapter
 - ◆ Multi-standard power supply
 - ◆ Hand-held PanelMouse remote control
 - ◆ User's manual
- 262K Color LCD Panel Includes:**
- ◆ LCD projection panel
 - ◆ VGA Y-cable
 - ◆ Mac II/Mac LC Y-cable
 - ◆ Switching mode power supply
- 32K Color LCD Panel Includes:**
- ◆ Hand-held infrared remote control
 - ◆ Soft carrying case
 - ◆ User's manual
 - ◆ LCD projection panel
 - ◆ VGA Y-cable and EGA/CGA Y-cable
 - ◆ UL* and CSA approved switch-mode power adapter
 - ◆ Hand-held infrared remote control
 - ◆ User's manual
