## PCMCIA Modems

### Key Features

- ▶ With PCMCIA Modem 144 you can transmit data and receive faxes at 14.4 Kbps
- ▶ PCMCIA Memory/Modem includes a fax/modem and a 4MB flash memory in one card
- ▶ Get voice mail in addition to a fax modem with the PCMCIA Voice/Modem 144

### Overview

Plug a PCMCIA Modem 144 into the Type III PCMCIA port on your notebook or laptop computer and you can maintain data and fax communications wherever you go. PCMCIA Modem 144, a V.32 bis modem for speeds up to 14.4 Kbps, automatically falls back and forward to maximize throughput when line conditions vary. V.42 and MNP® 2-4 protocol error control help guard your data against errors induced by line noise and other disruptions.

You can also send faxes from any Windows application with the included fax software.

The PCMCIA Memory/Modem 144 combines 14.4/9.6 Kbps fax send/receive and 2.4 Kbps modem functions with the

memory—4 MB—required to give sub-notebooks and palmtops with limited memory the ability to send, receive, store, and print faxes as well as large data files—all without having to swap cards. It features CCITT industry-standard error correction. Fallback for modems of slower speeds, auto-dial and answer are also included. Plus the PCMCIA Memory/Modem 144 can be used as non-volatile FLASH storage when the modem is not in use.

The PCMCIA Voice/Modem 144 packs voice mail and 14.4 Kbps data/fax capabilities into one package. So you can get messages anywhere you can find a phone jack or cellular phone—even if you can't answer the phone.

Its voice mail features include remote mail retrieval

and multiple mailboxes. Low power consumption, standby, and sleep modes save battery power by up to 90% when the modem is not in use. And it works with any PCMCIA 2.0 Type II, III, and Toshiba Type IV slot.

Its industry-standard error correction, data compression, and automatic line equalization for bad connections make sure that you'll get that important message!

PCMCIA Modems give you the mobile edge for business anytime, anywhere!

### Specifications

Maximum Speed—Fax: 14.4 Kbps, Data: 14.4 Kbps

Operation—Full-duplex only

Connectors—PCMCIA Slot 2; RJ-11

Power—From laptop

Size—3.3"H x 2.1"W x 0.2"D (8.4 x 5.3 x 0.5 cm)

Weight—< 0.1 lb. (<.1 kg)
