## Mini Driver Dual Line Driver Card

*Two complete RS-232 line drivers in one convenient, space-saving card!*

### Key Features

- ▶ Includes two complete RS-232 line drivers
- ▶ Full V.54/V.52 diagnostics
- ▶ Fully compatible with standalone line drivers
- ▶ Fits in MicroRACK System

### Overview

The Mini Driver Dual Line Driver Card is a dual rack card incorporating two short range modems. Attaining DC isolation through custom-designed ferrite core transformers, the Line Driver Card operates effectively between buildings. It operates full duplex at data rates to 19,200 bps over two twisted pair. Ranges are to 9 miles at 1200 bps and to 2.5

miles at 19,200 bps. It also incorporates Silicon Avalanche Diodes for protection against the damaging effects of nearby lightning strikes and other harmful transients.

The latest surface mount technology is used to attain high-quality short range modem performance in a convenient rack card. The Mini Driver Card is available

with RJ-11 or RJ-45 rear interface cards. For workgroup and desktop communications, the Card can be mounted in the MicroRACK system.

### Specifications

Protocol—Asynchronous
