## Async Dual Line Driver Card

*Two complete RS-232 line drivers in one convenient, space-saving card!*

### Key Features

- ▶ Includes two complete RS-232 line drivers
- ▶ Full V.54/V.52 diagnostics
- ▶ Fully compatible with standalone line drivers
- ▶ Fits in MicroRACK System

### Overview

The Async Dual Line Driver Card is a dual rack card incorporating two short range modems. Both units operate full duplex at data rates to 19.2 Kbps over 2 twisted pairs and support distances to 17 miles. The Card features 13 easy-to-read front panel LEDs, which monitor the status of data

transmission. It also incorporates Silicon Avalanche Diodes for protection against the damaging effects of nearby lightning strikes and other harmful transients.

The latest surface mount technology is used to attain high-quality short range modem performance in a

convenient rack card. For workgroup and desktop communications, the Card can be mounted in the MicroRACK system.

### Specifications
